

Investment Guide

6 January 2025

The Praemium Super PDS is issued by Diversa Trustees Limited ('the Trustee') ABN 49 006 421 638, AFSL 235153, RSE Licence No. L0000635 in its capacity as trustee of the Praemium SMA Superannuation Fund ('Praemium Super' or 'the Fund') ABN 75 703 857 864, an APRA-regulated superannuation fund. Praemium Australia Limited AFSL 297956 ('Praemium', 'we', 'our', 'us') ABN 92 117 611 784 is the Sponsor of the Praemium Super.

The Fund invests exclusively in the Separately Managed Accounts ARSN 114 818 530 scheme of which Praemium is the Responsible Entity ('the Scheme').

This guide forms part of the Praemium Super PDS ('PDS') dated 1 October 2024 and provides information on the investments available through the Fund. You should read this information before deciding whether to join the Praemium Super.

The information in this guide is of a general nature. It has been prepared without taking into account your investment objectives, circumstances, financial situation or needs. Before acting on the information in this PDS you should consider your own objectives, circumstances, financial situation and needs.

You should also consider seeking the advice of a licensed financial adviser. This publication is not intended to be, and should not be construed in any way as, investment, legal or financial advice.

The information in this guide is correct as at the date of publication. In the event of a material change occurring to any information contained in this guide, irrespective of whether it is adverse or not, the Trustee will notify existing members in writing within the time frames required by law. Updated information is available www.praemium.com/au/resources.

Additional explanation of Performance Fees

Performance Fees may be paid to a Model Portfolio Manager if a Model Portfolio adds value over a benchmark. The benchmark may be an index, an amount in excess of an index, zero or a specified return (for example 2% or the RBA cash rate).

The value added for each Model Portfolio relative to the benchmark is calculated for each Account each day of the performance period. Performance periods are calendar months unless otherwise stated in the Model Portfolio profile.

If the total value added for the period is negative no Performance Fee is payable and this amount is carried forward to the next period. A Performance Fee is only paid at the end of the performance period if the total value added for the period, plus any value added or carried forward from previous performance periods, is positive. Value added for a Model Portfolio includes all dividends but excludes any franking credits unless otherwise stated.

This means you will not pay a Performance Fee unless the total value added relative to the benchmark since inception for your Account is higher than at the end of any previous performance period.

Some Model Portfolios may impose an additional condition, which is that a Performance Fee is only paid where the return of the Model Portfolio, after payment of Performance Fees (absolute return), is positive. Where the return of the Model Portfolio is negative, the Performance Fee otherwise payable is carried forward.

The Performance Fee calculation is specific to each Account, so for any particular Model Portfolio over a performance period, some Accounts may be charged a Performance Fee while others are not, depending on the circumstances applicable to each investor's particular Account. For example, the timing of when the Account invested in a Model Portfolio will influence what, if any, Performance Fee is charged to the Account in respect of its allocation to that Model Portfolio. For Performance Fee calculation purposes, we consider only the Model Portfolio's performance and the weighting of your Account to the particular Model Portfolio. We ignore individual customisations and exclude the minimum cash component.

Examples of calculation of Performance Fee

The following examples are simplistic and for illustrative purposes only and may not reflect the actual Performance Fee charged to your Account.

Example 1. Value added over a benchmark

Assume an amount of \$100,000 is invested for 12 months, and the Performance Fee is calculated annually.

If the Model Portfolio's return for the year is 25% and the benchmark return is 20% then the excess performance is 5% and the Performance Fee would be calculated as follows:

- the investment return achieved is 25% of \$100,000 = \$25,000
- the benchmark return is 20% of \$100,000 = \$20,000
- value added (excess performance above benchmark) is (\$25,000 - \$20,000) = \$5,000

If the Performance Fee is 25% of excess performance above benchmark, then the fee charged by the Responsible Entity would be 25% of \$5,000 = \$1,250.

If the Performance Fee is 10% of excess performance above benchmark, then the fee charged by the Responsible Entity would be 10% of \$5,000 = \$500.

Example 2. Value added over an amount in excess of a benchmark

Assume an amount of \$100,000 is invested for 12 months, and the Performance Fee is calculated annually. If the Model Portfolio's return for the year is 25% and the benchmark return is 20% and the performance fee is based on the benchmark plus 2% then the excess performance is 25% - (20% + 2%) = 3% and the Performance Fee would be calculated as follows:

- the investment return achieved is 25% of \$100,000 = \$25,000
- the benchmark return plus 2% is (20% + 2%) of \$100,000 = \$22,000
- value added (excess performance above benchmark) is (\$25,000 - \$22,000) = \$3,000

If the Performance Fee is 25% of excess performance above the benchmark plus 2%, then the fee charged by the Responsible Entity would be 25% of \$3,000 = \$750.

If the Performance Fee is 10% of excess performance above the benchmark plus 2%, then the fee charged by the Responsible Entity would be 10% of \$3,000 = \$300.

Example 3. Performance must be greater than zero (absolute return)

Assume an amount of \$100,000 is invested for 12 months, and the Performance Fee is calculated annually. If the Model Portfolio's return for the year is -3% and the benchmark return is -5% then the excess performance is 2%. No Performance Fee would be payable as the Model Portfolio's return is less than 0%. However, the Performance Fee would be carried forward as follows:

- the investment return achieved is -3% of \$100,000 = -\$3,000
- the benchmark return is -5% of \$100,000 = -\$5,000
- value added (excess performance above benchmark) is (-\$3,000 - [-\$5,000]) = \$2,000

At the end of the next performance period \$2,000 will be added to the value added calculated for the new period. Though calculated daily the Performance Fees are assessed monthly, therefore you will only pay Performance Fees in respect of a Model Portfolio which added value over the month.

Holding restrictions applied to investments

Investment holding limits applied to Single Assets

The Trustee has set limits on how much you can invest in each individual managed fund, Exchange Traded Fund or listed security. For the security limit for individual managed funds, ETFs and Exchange Traded Bonds, please refer to the Single Assets List available www.praemium.com/au/resources.

The following holding restrictions apply to investments in listed securities. However, the Trustee reserves the right to place a different holding restriction on any security. The holding restriction may be temporary or permanent.

Listed securities holding limits

Security type	Single security limits
ASX Top 10 stocks	A maximum of 25 percent of a Member's Account balance can be invested in a single listed security holding within the ASX Top 10 stocks by market capitalisation.
Listed securities outside of the ASX Top 10 stocks but within the ASX Top 300	A maximum of 20 percent of a Member's Account balance can be invested in a single listed security holding for securities outside of the ASX Top 10 stocks but within the ASX Top 300 by market capitalisation.
Listed securities outside of the ASX Top 300	A maximum of 10 percent of a Member's Account balance can be invested in a single listed security holding for securities outside of the ASX Top 300.
Listed trusts including Listed Investment Companies (LICs), Exchange Traded Managed Funds (ETMFs) and Exchange Traded Funds (ETFs)	A maximum of 50 percent of a Member's Account balance can be invested in a single listed trust.
Listed interest rate securities*	A maximum of 20 percent of a Member's Account balance can be invested in a single listed interest rate security. An aggregated holding limit of 50% applies for investments in Exchange Traded Bonds.

*An interest rate security is a security that pays a fixed and/or floating rate of return. This return can be in the form of interest or dividends. The issuer (generally a listed company) usually promises to pay the holder a specified rate of interest (a coupon) during the life of the Interest Rate Security and to repay the face value (issue price or the principal) of the Interest Rate Security at a predetermined time (maturity date).

Investment holding limits applied to international listed securities

Predominantly the listed securities will comprise securities that are constituents of the MSCI World Index. The Trustee has imposed an upper holding limit of 20% on investment in any given international listed security available through the Fund. The Trustee reserves the right to impose a lower limit on any single security.

Investment holding limits applied to term deposits

The Trustee has imposed an upper holding limit of 95% on investment in any given term deposit available through the Fund. The Trustee reserves the right to impose a lower limit on any term deposit.

Single Assets

Managed Funds

Many managed funds as approved by the Trustee (for superannuation) or Responsible Entity (for non-super) are available as Single Assets using the APIR as the code. Managed funds may have additional fees as disclosed in the issuer's disclosure document/s. For more information please visit the issuer's website.

A list of available managed funds is accessible at www.praemium.com/resources.

Exchange Traded Products

Many Exchange Traded Products ('ETPs') as approved by the Trustee (for superannuation) or Responsible Entity (for non-super) are available as Single Assets using the ASX ticker as the code. ETPs may have additional fees as disclosed in the issuer's disclosure document/s. For more information please visit the issuer's website.

A list of available ETPs is accessible at www.praemium.com/resources.

ASX Listed Securities & Hybrids

Many of the largest 300 Australian Securities Exchange (ASX) listed securities and additional ASX listed securities approved by the Trustee (for superannuation) or Responsible Entity (for non-super) are available as Single Assets using the ASX ticker as the code.

A list of available securities is accessible at www.praemium.com/resources.

International Listed Securities

Many of the largest MSCI World listed securities and other international securities as approved by the Trustee (for superannuation) or Responsible Entity (for non-super) are available as Single Assets using the security and exchange code ticker as the code.

A list of available securities is accessible at www.praemium.com/resources.

Term deposits

A range of term deposits provided by Australian banks are available through your Nominated Representative or financial adviser.

Standard Risk Measure

This Investment Guide indicates the Standard Risk Measure 'risk band' for each Model Portfolio.

The Standard Risk Measure is based on industry guidance to allow members to compare investment options that are expected to deliver a similar number of negative annual returns over any 20 year period.

The Standard Risk Measure is not a complete assessment of all forms of investment risk, for instance it does not detail what the size of a negative return could be or the potential for a positive return to be less than a member may require to meet their objectives. Further, it does not take into account the impact of administration fees and tax on the likelihood of a negative return.

Members should still ensure they are comfortable with the risks and potential losses associated with their chosen investment option/s.

Risk Band	Risk Label	Estimated number of negative annual returns over any 20 year period
1	Very Low	Less than 0.5
2	Low	0.5 to less than 1
3	Low to medium	1 to less than 2
4	Medium	2 to less than 3
5	Medium to high	3 to less than 4
6	High	4 to less than 6
7	Very high	6 or Greater

Model Portfolio Profile: AC0001

AAN Core

Investment objective: The Core portfolio's investment objective is to outperform CPI by 3.0% p.a before fees over rolling 5-year periods.

Investment description

The Core portfolio is an actively managed portfolio providing a diversified exposure with a neutral tilt towards growth asset classes (65%) relative to defensive asset classes (35%). The portfolio is constructed using a multi-manager approach which seeks to incorporate a blend of investment styles.

The portfolio will generally be reweighted to its strategic weights quarterly and may employ a blend of active and passive investment styles based on market conditions. Investment exposure is obtained through a combination of direct equities, exchange traded products and/or managed funds.

Who is this option suitable for?

Investors who:

- seek a moderate return above inflation through exposure to a diversified portfolio with a tilt towards growth asset classes;
- seek exposure to a portfolio diversified across a range of asset classes and blend of underlying investment styles;
- are prepared to accept a degree of volatility in their portfolio to allow for achieving the longer-term investment objective; and
- can invest for a period of at least 5 years.

AAN Growth

Investment objective: The Growth portfolio's investment objective is to outperform CPI by 4.0% p.a before fees over rolling 7-year periods.

Investment description

The Growth portfolio is an actively managed portfolio providing a diversified exposure with a focus on growth asset classes (90%) relative to defensive asset classes (10%). The portfolio is constructed using a multi-manager approach which seeks to incorporate a blend of investment styles.

The portfolio will generally be reweighted to its strategic weights quarterly and may employ a blend of active and passive investment styles based on market conditions. Investment exposure is obtained through a combination of direct equities, exchange traded products and/or managed funds.

Who is this option suitable for?

Investors who:

- seek a higher return above inflation through exposure to a diversified portfolio with an emphasis towards growth asset classes;
- seek exposure to a portfolio diversified across a range of asset classes and blend of investment styles;
- are prepared to accept a higher level of volatility in their portfolio to allow for achieving the longer-term investment objective; and
- can invest for a period of at least 7 years.

Model Portfolio Profile: AC0003

AAN Australian

Investment objective: The AAN Australian Model's investment objective is to outperform the S&P/ASX 300 Accumulation Index before fees over rolling 7-year periods.

Investment description

The AAN Australian model provides exposure to an actively managed portfolio of Australian equities. The portfolio is constructed using a multi-manager approach which seeks to reduce style bias and may employ a blend of active and passive investment styles based on market conditions. Investment exposure is obtained through a combination of direct equities, exchange traded products and/or managed funds.

Who is this option suitable for?

Investors who:

- seek exposure to a portfolio of Australian equity securities using a multi-manager portfolio construction approach and an emphasis on reducing style bias;
- are prepared to accept capital volatility associated with listed equities; and
- can invest for a period of at least 7 years.

AAN Index Core

Investment objective: The Index Core portfolio's investment objective is to outperform CPI by 2.5% p.a before fees over rolling 5-year periods.

Investment description

The Index Core portfolio is an actively managed diversified portfolio which obtains exposure using a blend of passive ETFs listed on the ASX and index based managed funds. The portfolio is constructed with a strategic growth exposure of 65% and defensive exposure of 35%. The portfolio will generally be reweighted to its strategic weights quarterly.

Who is this option suitable for?

Investors who:

- seek a diversified portfolio with a slight emphasis on growth assets with exposure obtained via a blend of passive ETFs and/or managed fund based investment options;
- are prepared to accept a degree of volatility in their portfolio to allow for achieving the investment objective; and
- can invest for a period of at least 5 years.

Model Portfolio Profile: AC0006

AAN Sustainable Growth

Investment objective: The AAN Sustainable Growth Model has an objective to outperform CPI by 4% p.a before fees over rolling 7-year periods, through investing in a diversified portfolio of growth and income assets that meet the manager’s ESG requirements.

Investment description

The model caters for investors seeking a portfolio of predominantly growth assets that aligns with their preference for sustainable investments with potential for making a positive contribution to society. It uses a multi-manager approach to provide investment diversification as well as differentiated approaches to ESG investing. The model has a strategic allocation of 90% to growth assets and 10% to defensive assets. It seeks exposure to Australian and international shares, property and fixed income assets via investing in managed funds, ETFs and/or Australian equity model portfolios.

Whilst underlying investment managers will employ their own sustainable investment approach, the overall model is managed according to the manager’s Sustainable Investment Policy which seeks to avoid the following sectors:

- Tobacco and tobacco products
- Gambling
- Alcohol
- Pornography
- Armaments manufacture or distribution
- High impact fossil fuels
- Predatory lending

A company with a minor or indirect exposure to one of the sectors will not be automatically excluded, although may be subject to ongoing review by the manager.

Who is this option suitable for?

The portfolio is designed to be suitable as a total portfolio allocation or as an allocation within a broader portfolio, and is suitable for investors who seek:

- a multi-asset growth focused portfolio with exposure to a blend of passive and active investment styles;
- investments that align with their preference for sustainable investments with potential for making a positive contribution to society.

Agentia Australian Equity Multi Manager

Investment objective: To outperform the S&P/ASX 200 Index (TR) after fees over a rolling period of 3 years and to provide moderate to high levels of tax effective income and capital growth over the medium to long term.

Investment description

Agentia Pty Ltd (Multi Manager) will select a minimum of two Model Portfolios or ETF's from the Australian Equity Managers that are available on Agentia.

Who is this option suitable for?

Investors who:

- seek tax-effective income from franked dividends plus capital growth from listed Australian securities over the medium to long term of three to five years;
- accept the risk of price fluctuations; and
- prefer portfolios with lower turnover to increase tax effectiveness over the medium term.

Model Portfolio Profile: WB0003

Agentia Income/Pension – Moderately Low

Investment objective: To maximise the probability of achieving returns of CPI (Inflation) +2% over rolling 4-year periods. The portfolio also aims to maximise income and minimise the risks of short-term falls in portfolio value subject to these parameters.

Investment description

Agentia Income/Pension Portfolios have been developed to meet the requirements of four different risk profiles. They each focus on income and yield. This model uses an asset allocation split of 35% growth assets and 65% defensive assets plus or minus 5%.

Who is this option suitable for?

Investors who:

- consider capital security to be somewhat more important than capital growth;
 - accept that avoiding fluctuations in capital value means a relative lack of capital growth;
 - accept a lack of capital growth in order to achieve capital security;
 - are likely to invest the majority of a portfolio in defensive assets, with a significant minority in growth assets;
 - know that a portfolio must have defensive assets to achieve a reasonable level of capital security, with diversification into growth assets to maintain capital growth; and
- have an investment time frame of 4 years plus – excluding income stream requirements.

Agentia Income/Pension – Balanced

Investment objective: To maximise the probability of achieving returns of CPI (Inflation) +3% over rolling 5-year periods. The portfolio also aims to maximise income and minimise the risks of short-term falls in portfolio value subject to these parameters.

Investment description

Agentia Income/Pension Portfolios have been developed to meet the requirements of four different risk profiles. This model uses an asset allocation split of 50% growth assets and 50% defensive assets plus or minus 5%.

Who is this option suitable for?

Investors who:

- seek a balance between capital growth and capital security;
- understand that investment strategies can lead to fluctuations in capital value;
- expect that capital growth and capital security must be compromised to achieve investment objectives;
- are just as likely to invest in defensive assets as growth assets;
- understand that portfolio diversification is important to achieve the investment outcome; and
- have an investment time frame of 5 years plus – excluding income stream requirements.

Model Portfolio Profile: WB0013

Agentia Accumulation/Growth – 100% Growth

Investment objective: To maximise the probability of achieving returns of CPI (Inflation) + 6% over rolling 10-year periods after fees. The portfolio will be constructed to primarily focus on capital growth opportunities across growth asset classes but will also generate some income from growth assets.

Investment description

The Agentia Accumulation/Growth – 100% Growth Model employs a multi-manager approach to the management of the underlying investments.

The model has been designed to provide investment access to a diversified range of growth assets that can be used to blend with other investment asset classes to provide the investor with the level of risk v return that they specifically require. The underlying investment vehicles will be monitored to ensure that the investment continues to perform as expected. If necessary, underlying investment vehicles will be removed and/or replaced by the Model Manager.

The model will have exposure to a range of growth asset classes including property, Australian shares and international shares to provide the level of diversification and the risk/return characteristics that are appropriate for the investment objectives of the relevant portfolio.

Who is this option suitable for?

Investors who:

- are seeking a higher rate of return and the opportunity to achieve higher levels of capital growth over the long term;
- are comfortable with significant fluctuations in the capital value of their investments in the short to medium term;
- want to blend this growth model with a portfolio of defensive assets to achieve an overall asset allocation that provides them with the risk v return characteristics they require; and
- have an investment time frame of 10 years or more.

Model Portfolio Profile: IF0020

Alpha Moderate

Investment objective: To achieve returns, net of investment management fees, of CPI of plus 2.0% over rolling 4-year periods.

Investment description

The investment approach is focused on assessing the absolute opportunity set available for the underlying asset classes over an appropriate time frame, and then, understanding the nearer-term drivers of asset class and respective investment strategy returns, construct a multi-manager multi-asset portfolio that is actively managed and produces the optimal risk-adjusted return to achieve the portfolio's overall objective.

Who is this option suitable for?

Investors who:

- seek stability of income and capital preservation;
- understand that an infrequent risk of capital loss can be expected and overall returns are likely to be modestly above the rate of inflation;
- seek a portfolio diversified across a range of different asset classes; and
- want a portfolio where the asset allocation is actively managed based on changes in market valuation.

Benchmark

Model Portfolio Profile: IF0024

Alpha High Growth Portfolio

Investment objective: To achieve returns, net of investment management fees, of CPI plus 4.5% over rolling 10-year periods.

Investment description

The investment approach is focused on assessing the absolute opportunity set available for the underlying asset classes over an appropriate time frame, and then, understanding the nearer-term drivers of asset class and respective investment strategy returns, construct a multi-manager multi-asset portfolio that is actively managed and produces the optimal risk-adjusted return to achieve the portfolio's overall objective.

Who is this option suitable for?

Investors who:

- seek a high return above inflation;
- have a high tolerance for risk and therefore are willing to accept a high degree of volatility in their portfolio in order to achieve their long-term investment objective;
- seek a portfolio diversified across a range of different asset classes; and
- want a portfolio where the asset allocation is actively managed based on changes in market valuation.

Benchmark

Model Portfolio Profile: IF0025

Alpha Income Portfolio

Investment objective: To achieve CPI + 1% over rolling 3 year periods, net of fees.

Investment description

The Alpha Income portfolio is a multi-sector multi strategy Separately Managed Account (SMA) built to a conservative risk allocation with a range of 0-20% allocated to growth assets, which is actively managed in both asset allocation and security/manager selection. It seeks to deliver a return of inflation as measured by CPI plus a margin of 1% p.a. over rolling 3-year periods.

The investment approach is focused assessing the absolute opportunity set available for the underlying asset classes over an appropriate time frame and then, understanding the nearer term drivers of asset class and respective investment strategy returns, construct a portfolio that produces the optimal risk adjusted return to achieve the portfolio's overall objective. The portfolio may gain exposure through a combination of direct ASX listed equities, ASX listed exchange traded products and unlisted managed funds.

Who is this option suitable for?

This portfolio is created to be used as a whole of portfolio solution or as a part of the "defensive exposure" for investors primarily focused on the sustainable generation of income while preserving capital and purchasing power over time using a multi-sector multi-strategy portfolio construction approach.

Model Portfolio Profile: AT0001

Antares Elite Opportunities Model

Investment objective: Aims to outperform the S&P/ASX 200 Total Return Index after investment fees over rolling five year periods.

Investment description

The model takes large positions in a concentrated portfolio of typically up to 30 companies; although can hold up to 35 stocks. This portfolio will be invested in companies expected to have the greatest potential for long-term value.

Who is this option suitable for?

Investors with an investment timeframe of 5 years or more.

Investors seeking exposure to a concentrated portfolio of Australian shares positioned for capital growth with less focus on income.

Model Portfolio Profile: AT0002

Antares Dividend Builder Model

Investment objective: Aims to generate higher levels of dividend income than the S&P/ASX 200 Industrials Total Return Index and moderate capital growth over rolling five year periods.

Investment description

The model is designed for investors seeking a tax effective income stream through participating in the Australian share market and investing in companies that are expected to provide high yields relative to the market. Given the model's focus on generating tax effective income, the model is suited to investors seeking a regular distribution from their investments.

Who is this option suitable for?

Investors with an investment timeframe of 5 years or more.

Investors seeking a tax effective income stream and regular distributions from a portfolio of Australian shares expected to provide high yields relative to the market.

Model Portfolio Profile: AT0003

Antares Ex-20 Australian Equities Model

Investment objective: Aims to outperform the S&P/ASX Mid Cap 50 Total Return Index after investment fees over rolling five year periods.

Investment description

The model contains only Antares' highest conviction investment ideas in Australian shares that are outside the S&P/ASX 20 Total Return Index at the time of selection for the model. Otherwise it is relatively unconstrained at the stock and sector level.

Who is this option suitable for?

Investors with an investment timeframe of 5 years or more.

Investors seeking exposure to a concentrated portfolio of Australian shares that are generally outside of the largest 20 companies listed on the Australian share market and positioned for capital growth with less focus on income.

Model Portfolio Profile: AI0001

AssureInvest Multi-Asset – Moderate Growth

Investment objective: To provide growth in capital value over time through a focus on the best global multi-asset opportunities. The portfolio aims to outperform the benchmark over a multi-year timeframe of five to seven years.

Investment description

To suit the financial goals and risk-tolerance of moderate-growth-type investors, the portfolio will typically be modestly tilted toward growth-style assets, but the weighting to asset classes will be altered at times to take advantage of transient opportunities to boost portfolio returns and minimise risks.

Who is this option suitable for?

Investors who seek total returns comfortably in excess of inflation, but are willing to accept a lower return than otherwise given the possible need to access a stable income stream and wish to mitigate portfolio volatility through a reasonable weighting to income-style assets.

AssureInvest Multi-Asset – High Growth

Investment objective: To provide high levels of growth in capital value over time through a focus on the best global multi-asset opportunities. The portfolio aims to outperform the benchmark over a multi-year timeframe of five to seven years.

Investment description

AssureInvest actively manages across income-style assets like cash and fixed income and growth-style assets like Australian and International securities and property. To suit the financial goals and risk-tolerance of high-growth-type investors, the portfolio will typically be strongly tilted toward growth-style assets, but the weighting to asset classes will be altered at times to take advantage of transient opportunities to boost portfolio returns and minimise risks.

Who is this option suitable for?

Investors who seek total returns well in excess of inflation and are prepared to accept wide fluctuations in capital values.

Model Portfolio Profile: AI0003

AssureInvest Australian Equities Portfolio

Investment objective: To out-perform the S&P/ASX 200 Accumulation Index over rolling seven year periods.

Investment description

A concentrated and diversified portfolio of attractively-valued Australian listed companies, identified by the manager's unique research process which focusses on businesses possessing competitive advantages, strong free cash flow, earnings growth potential, robust balance sheets and value-accretive management.

The manager utilises a patient and disciplined approach with a steadfast commitment to their investment philosophy and structured investment process to promote the likelihood of successful outcomes while reducing the risk of permanent capital loss.

Who is this option suitable for?

Investors seeking high levels of capital growth with no need to access capital for the long-term. Prepared to accept wide fluctuations in capital values including occasional negative years. The typical timeframe for investment is 7+ years.

Model Portfolio Profile: AL0010

Atlas Concentrated Australian Equity Portfolio

Investment objective: To outperform the S&P ASX 200 (TR) Index, over a rolling five-year period, after fees.

Investment description

The portfolio's investment strategy is based on the concept of quality investing. Atlas uses a bottom-up approach which seeks to invest in a select group of high quality companies demonstrating attractive fundamentals such as recurring earnings, dividend yield and lower gearing, while seeking to avoid companies with excessive leverage and more volatile earnings. The manager will also focus on franking as a signal of earnings quality and sustainability.

Who is this option suitable for?

Investors who:

- Seek a concentrated portfolio of listed Australian equity companies providing long-term capital growth and a higher dividend yield (including franking credits) than the portfolio benchmark;
- accept the risk of price fluctuations, particularly over periods less than the minimum investment timeframe and that capital preservation is not guaranteed; and
- are prepared to invest for the minimum investment timeframe or longer.

Model Portfolio Profile: AU0100

Australian Ethical Australian Shares Portfolio

Investment objective: To provide a total return after fees and costs that is above the S&P/ASX200 Accumulation Index over rolling five-year periods.

Investment description

The Portfolio is an actively managed diversified Australian share portfolio with companies selected on the basis of their social, environmental and financial credentials. The portfolio has a focus on large, liquid stocks aiming to deliver returns in excess of the S&P/ASX 200 Accumulation Index.

All investments are centred around the 23 principles of the Australian Ethical Charter which guides the Model Portfolio Manager to invest in ethical and responsible initiatives that have a positive impact on people, the planet and animals and avoid investments in companies that engage in harmful products or practices such as coal, oil, weapons, tobacco, gambling and human rights abuses. As a result, the portfolio is expected to have a substantial underweight to the resources sector.

Who is this option suitable for?

Investors who are looking for:

- an actively managed Australian equities portfolio that seeks to invest in companies that meet ethical investment guidelines, while also delivering market competitive returns;
- a combination of long-term capital growth and yield from a portfolio of Australian stocks; and
- an Australian equities portfolio constructed using a benchmark unaware approach and have a high tolerance to risk.

Model Portfolio Profile: BB0101

BetaShares DAA ETF – Conservative

Investment objective: To provide investors with a broadly diversified portfolio consistent with a conservative risk profile. The portfolio aims to maximise potential returns for an investor subject to the expectation of no more than 1 negative annual total return year over a 20-year period. It seeks to provide a long-run return of CPI +1.50% per annum.

Investment description

The return profile of the portfolio aims to be enhanced relative to the strategic asset allocation via dynamic asset allocation which seeks to capture medium term trends via an assessment of current asset price valuations as well as economic and financial market trends across global markets. The dynamic asset allocation process and any portfolio changes are normally implemented quarterly.

Our investment strategy is conducted by an experienced, multidisciplinary team of professionals within BetaShares.

Who is this option suitable for?

Investors who:

- seek access to a cost-effective, diversified, dynamically adjusted model portfolio with a conservative risk profile;
- want an opportunity to generate enhanced returns in a risk-controlled manner via a robust framework; and
- seek best-of-breed ETF selection that extends beyond the product suite of the model manager and includes those manufactured by other ETF issuers.

BetaShares DAA ETF – Growth

Investment objective: To provide investors with a broadly diversified portfolio consistent with a growth risk profile. The portfolio aims to maximise potential returns for an investor subject to the expectation of no more than 4 negative annual total return years over a 20-year period. It seeks to provide a long-run return of CPI +4.00% per annum.

Investment description

The return profile of the portfolio aims to be enhanced relative to the strategic asset allocation via dynamic asset allocation which seeks to capture medium term trends via an assessment of current asset price valuations as well as economic and financial market trends across global markets. The dynamic asset allocation process and any portfolio changes are normally implemented quarterly.

Our investment strategy is conducted by an experienced, multidisciplinary team of professionals within BetaShares.

Who is this option suitable for?

Investors who:

- seek access to a cost-effective, diversified, dynamically adjusted model portfolio with a growth risk profile;
- want an opportunity to generate enhanced returns in a risk-controlled manner via a robust framework; and
- seek best-of-breed ETF selection that extends beyond the product suite of the model manager and includes those manufactured by other ETF issuers.

Model Portfolio Profile: BB0106

BetaShares Australian Sustainability Leaders

Investment objective: The portfolio aims to approximate the return of the Nasdaq Future Australian Sustainability Leaders Index.

Investment description

The BetaShares Australian Sustainability Leaders SMA provides exposure to a basket of approximately 30 Australian listed companies that have passed screens to exclude companies with direct or significant exposure to fossil fuels or engaged in activities deemed inconsistent with responsible investment considerations.

The portfolio will be constructed as a subset of the Nasdaq Future Australian Sustainability Leaders Index and include the largest companies by free float market capitalisation within each industry. The portfolio's return may deviate from the benchmark when larger companies within the index outperform/underperform smaller companies within the index.

Who is this option suitable for?

Investors who:

- Seek a core Australian equities allocation or a tactical exposure to Australian equities, which provides transparency and diversification benefits in addition to being consistent with ethical and sustainability objectives;
- have an investment timeframe of at least 7 years; and
- are able to accept the risk associated with listed equities.

BetaShares Ethical Diversified Balanced

Investment objective: To provide exposure to a multi asset portfolio with a balance to growth and defensive assets alongside a broad set of ESG considerations. The portfolio aims to provide a return in line with the composite benchmark.

Investment description

The BetaShares Ethical Diversified Balanced SMA provides exposure to a passive blending of asset classes including Australian and global shares and bonds, according to a balanced strategic asset allocation. The portfolio is constructed using BetaShares' true-to-label, RIAA-certified ethical ETFs and BetaShares Australian Sustainability Leaders SMA – which combine positive climate leadership screens with a broad set of ESG criteria.

Who is this option suitable for?

Investors who:

- Seek a diversified portfolio constructed using a passive blending of asset classes that are consistent with ethical and sustainability objectives; and
- have a 'medium' tolerance for risk with an investment timeframe of at least 5 years.

CGWM Conservative Portfolio

Investment objective: To achieve a return of CPI + 1.0% per annum over rolling 2-year periods.

Investment description

This multi-asset portfolio invests across Australian equities, international equities, property, infrastructure, fixed interest, alternatives and cash. The size of allocations to each asset class will be actively managed in line with the Investment Committee's assessment of future risk and return prospects. The portfolio may engage specialist active managers and/or exchange traded funds within each asset class.

Who is this option suitable for?

Investors who:

- seek a return above inflation but with a low to medium tolerance for risk and are therefore willing to accept lower returns for a lower level of risk;
- are willing to invest for at least 2 years;
- seek to grow their wealth to meet short to medium term goals and are sensitive to large short-term changes in the value of their investment;
- seek a portfolio diversified across a range of asset classes;
- seek a portfolio in which asset allocation is professionally and actively managed based on changes in market valuations and perceived future risks; and
- seek a portfolio with a mix of both active management and lower-cost passive investments.

CGWM Growth Portfolio

Investment objective: To achieve a return of CPI + 3.5% per annum over rolling 5-year periods.

Investment description

This multi-asset portfolio invests across Australian equities, international equities, property, infrastructure, fixed interest, alternatives and cash. The size of allocations to each asset class will be actively managed in line with the Investment Committee's assessment of future risk and return prospects. The portfolio may engage specialist active managers and/or exchange traded funds within each asset class.

Who is this option suitable for?

Investors who:

- seek a high return above inflation but with a medium to high tolerance for risk and are therefore willing to accept a medium to high degree of volatility in their portfolio in order to achieve their long-term objectives;
- are willing to invest for at least 5 years;
- seek to grow their wealth to meet medium to long term goals and have a low sensitivity to large short-term changes in the value of their investment;
- seek a portfolio diversified across a range of asset classes;
- seek a portfolio in which asset allocation is professionally and actively managed based on changes in market valuations and perceived future risks; and
- seek a portfolio with a mix of both active management and lower-cost passive investments.

CGWM Australian Equities Portfolio

Investment objective: To generate long term capital growth through investing in a portfolio of Australian equities, managed funds and ETFs and to outperform a composite index of 80% ASX 300 Index (TR) & 20% ASX Small Ordinaries Index (TR).

Investment description

This portfolio invests across Australian equities using an approach of accessing the concentrated portfolios of specialist managers, managed funds and/or exchange traded funds. The manager may change the allocation between different styles of active management as their relative future return prospects change.

Who is this option suitable for?

Investors who:

- seek a medium to long term investment;
- are willing to invest for at least 5 years;
- accept the risk of significant fluctuations in the value of their investment; and
- seek a portfolio with a mix of both active stock selection and lower-cost passive investments.

Model Portfolio Profile: CL0101

Clime Multi-Asset Balanced Model

Investment objective: To match or outperform the benchmark over rolling 5-year periods by providing a moderate level of capital growth and income through exposure to a diversified portfolio of investments.

Investment description

This model invests in all-cap Australian equities and managed funds. The focus is on asset allocation to a blend of growth (Australian and international equities) and defensive (fixed income, fixed interest, alternatives / property / infrastructure) assets that match each portfolio's investor risk profile. The model employs an active asset allocation approach, seeking to tilt the model to asset classes that exhibit the desirable return characteristics whilst balancing overall model risk.

Who is this option suitable for?

This model is designed for investors who are seeking some level of capital preservation over the 5 year minimum investment time frame and some level of growth.

Investors in the model will be prepared to forego the potential of higher returns for lower volatility and the some preservation of capital.

Model Portfolio Profile: CL0102

Clime Multi-Asset Growth Model

Investment objective: To match or outperform the benchmark over rolling 6-year periods by providing a medium to high level of capital growth and medium to low level of income through exposure to a diversified portfolio of investments.

Investment description

This model invests in all-cap Australian equities and managed funds. The focus is on asset allocation to a blend of growth (Australian and international equities) and defensive (fixed income, fixed interest, alternatives / property / infrastructure) assets that match to a Growth investor risk profile. The model employs an active asset allocation approach, seeking to tilt the model to asset classes that exhibit the desirable return characteristics whilst balancing overall model risk.

Who is this option suitable for?

This model is designed for investors who are seeking a medium to high level of capital growth with a medium to low level of income.

Investors in the model will be prepared to sustain the higher volatility that is consistent with generation of higher returns.

Model Portfolio Profile: CL0103

Clime Multi-Asset High Growth Model

Investment objective: To match or outperform the benchmark over rolling 7-year periods by providing a high level of capital growth and low level of income through exposure to a diversified portfolio of predominantly equity investments.

Investment description

This model invests in all-cap Australian equities and managed funds. The focus is on asset allocation to a majority of growth assets (Australian and international equities) with a small exposure to defensive (fixed income, fixed interest, alternatives / property / infrastructure) assets that match to a High Growth investor risk profile. The model employs an active asset allocation approach, seeking to tilt the model to asset classes that exhibit the desirable return characteristics whilst balancing overall model risk.

Who is this option suitable for?

This model is designed for investors who are seeking a high level of capital growth with a low level of income.

Investors in the model portfolio will be prepared to sustain the higher volatility that is consistent with generation of higher returns.

Model Portfolio Profile: EB0001

EIS Ethical Moderate Growth Model

Investment objective: To provide an ethically screened multi-asset portfolio with the aim of outperforming the benchmark over rolling 5-year periods.

Investment description

The EIS Ethical Moderate Growth Model offers investors access to an ethically screened multi-asset portfolio. The portfolio will access a combination of direct shares and managed funds to gain exposure across a mixture of income producing assets such as fixed interest (around 40% of portfolio) as well as growth assets such as Australian and international equities and property (around 60% of portfolio). The allocations will be actively managed based on market conditions and will seek to provide a diversified exposure across large, mid and small cap companies. The combination aims to ameliorate the volatility and risk of the overall strategy.

All investment decisions employ a combination of negative and positive screening, which has been developed from the manager's 30+ years' experience providing ethical investment solutions. Common negative filters seek to exclude investments engaged in fossil fuels, land degradation caused by mining, animal cruelty, human rights abuse, weapons and armaments, gambling, tobacco, old growth and native forest logging. Positive filters seek to include investments that can make a positive impact in making the world a better place.

Who is this option suitable for?

This option is suitable for investors who:

- This model will generally suit a Balanced/Moderate investor seeking an ethical investment portfolio;
- Is willing to accept some volatility in order to achieve higher expected portfolio growth;
- Can invest for a minimum investment term of five years.

EIS Ethical Growth Model

Investment objective: To provide an ethically screened multi-asset portfolio with the aim of outperforming the benchmark over rolling 7-year periods.

Investment description

The EIS Ethical Growth Model offers investors access to an ethically screened multi-asset portfolio. The portfolio will access a combination of direct shares and managed funds to gain exposure across a mixture of income producing assets such as fixed interest (around 20% of portfolio) as well as growth assets such as Australian and international equities and property (around 80% of portfolio). The allocations will be actively managed based on market conditions and will seek to provide a diversified exposure across large, mid and small cap companies. The combination aims to achieve the growth element over the long term.

All investment decisions employ a combination of negative and positive screening, which has been developed from the manager's 30+ years' experience providing ethical investment solutions. Common negative filters seek to exclude investments engaged in fossil fuels, land degradation caused by mining, animal cruelty, human rights abuse, weapons and armaments, gambling, tobacco, old growth and native forest logging. Positive filters seek to include investments that can make a positive impact in making the world a better place.

Who is this option suitable for?

This option is suitable for investors who:

- This model will generally suit a Growth investor seeking an ethical investment portfolio;
- Is willing to accept higher volatility to achieve higher portfolio growth;
- Can invest for a minimum timeframe of seven years.

Model Portfolio Profile: EL0001

Elston Australian Large Companies Portfolio

Investment objective: The aim of the portfolio is to outperform the S&P/ASX 100 Accumulation Index (after fees) over a rolling five-year period.

Investment description

The Elston Australian Large Companies Portfolio provides exposure to an actively managed portfolio of predominantly Australian equities.

In general, the portfolio will have a long-term average exposure of around 97% in growth assets and 3% in defensive assets, however the allocations will be actively managed within the allowable asset allocation ranges depending on market conditions.

Who is this option suitable for?

Investors who:

- seek long-term capital growth above inflation;
- seek tax-effective income growth;
- seek a non-index weighted portfolio construction; and
- have a minimum investment timeframe of five years.

Model Portfolio Profile: FD0001

Fidelity Australian High Conviction Portfolio

Investment objective: To achieve returns in excess of the S&P ASX 200 TR Index over the mid to long term.

Investment description

The model invests in a diversified selection of around 20-35 Australian companies. The portfolio manager invests in high-quality businesses displaying strong earnings growth that are attractively valued.

The portfolio is a concentrated collection of the highest conviction 'best ideas' across the full spectrum of market capitalisation with a strong focus on risk management. Designed to be a core holding.

Who is this option suitable for?

Investors who:

- Seek exposure to a portfolio of actively managed direct Australian equities that can be used as a core exposure;
- Can invest for a minimum period of five to seven years; and
- Have a tolerance for a high amount of risk associated with listed equities.

Model Portfolio Profile: IF0012

Infocus Australian Shares – Income

Investment objective: To provide investors with greater risk-adjusted returns and a higher sustainable franked dividend yield relative to the S&P/ASX 200 Index (TR) in the long term.

Investment description

This is an actively managed and concentrated portfolio consisting of ASX-listed stocks covered by Morningstar's large Equity Research team. Morningstar focuses portfolio exposure on companies with competitive advantages, a market price offering margin of safety, a sustainable dividend yield above the benchmark, and franking credits. This combination of factors helps to preserve capital and reduce volatility in various market environments.

Who is this option suitable for?

The Australian Shares Income Model Portfolio is designed for investors seeking a reliable, above-market average income yield with moderate long-term capital growth relative to that of the performance benchmark.

InvestSense Better World 2

Investment objective: To achieve a return of CPI +2% per annum over the long-term by investing in a diverse mix of asset classes covering Australian equities, international equities, property, infrastructure, alternatives, fixed interest and cash.

Investment description

The portfolio will invest across a mix of asset classes including Australian equities, International equities, property, infrastructure, fixed interest, alternatives and cash. The portfolio may access these asset classes through listed securities, exchange-traded-funds, separately-managed-accounts, managed funds, and cash.

Who is this option suitable for?

Investors who:

- seek a portfolio with socially conscious and ethically biased investments;
- seek a modest return above inflation but with a medium tolerance for risk and therefore are willing to accept some volatility in their portfolio in order to achieve their long-term investment objective;
- seek a portfolio diversified across a range of different asset classes; and
- want a portfolio where the asset allocation is actively managed based on changes in market valuation.

iShares ESG Balanced

Investment objective: To match or outperform a long run, composite balanced multi-asset class benchmark, incorporating sustainability & ESG considerations.

Investment description

The ESG Balanced Model aims to provide investors with attractive returns consistent with a 'diversified' balanced' investment strategy encompassing:

- A long run, strategic asset allocation process leveraging a well-researched global framework built by BlackRock.
- Efficient & cost-effective implementation via sustainability focused iShares Exchange Traded exposures & managed funds. iShares sustainability focused funds and ETFs incorporate a range of exclusionary screens and an optimised Environment, Social and Governance scoring process.

Who is this option suitable for?

Investors who:

- seek access to a low-cost, diversified, risk based Model Portfolio;
- seek a diversified, managed model portfolio within a risk controlled framework;
- seek to leverage BlackRock's global expertise and research capabilities; and
- looking to incorporate Environmental, Social & Governance considerations within the portfolio.

Model Portfolio Profile: JB0002

JBWere Income

Investment objective: To provide investors with a consistent source of income which exceeds the rate of inflation over the long term (5 years plus) and exceeds that of the S&P/ASX 200 Index (TR).

Investment description

The model consists of ASX listed stocks that pay fully franked dividends (for example those in the banking sector) and companies paying annuity style distributions (those in the infrastructure sector) will feature prominently.

Who is this option suitable for?

Investors who:

- seek consistent income streams and portfolio yield from a well-researched portfolio;
- seek a longer-term investment horizon of at least five years; and
- acknowledge the risk of price fluctuation.

Model Portfolio Profile: JP0001

Joseph Palmer Conservative

Investment objective: To provide a relatively secure portfolio over the investment timeframe through exposure to a diversified portfolio of investments, with a strong emphasis on income generating assets and to outperform the benchmark over rolling five-year periods.

Investment description

The Conservative portfolio is designed for investors seeking a diversified portfolio with a majority proportion invested in income bearing style assets and a lesser proportion in capital growth styled assets.

It is suitable for investors seeking a high level of annual income without entirely eliminating capital growth opportunities. The portfolio looks to invest a significant proportion of available funds in cash, term deposits and other interest-bearing securities and the remainder in growth assets (shares and property). It is designed for investors with a low to medium risk profile.

Who is this option suitable for?

Investors who:

- seek relatively stable, regular income from low-volatility assets, but with some exposure to the share market;
- are focused on capital preservation and are prepared to forego the potential of higher returns for lower volatility and the preservation of capital;
- accept the risk of price fluctuations particularly over periods less than the minimum investment timeframe and that capital preservation is not guaranteed.

Model Portfolio Profile: JP0002

Joseph Palmer Balanced

Investment objective: To provide a relatively secure portfolio over the investment timeframe through exposure to a diversified portfolio of investments, with an emphasis on both capital growth assets and income generating assets and to outperform the benchmark over rolling five-year periods.

Investment description

The Balanced portfolio is designed for investors seeking a diversified portfolio with an equal to modestly overweight exposure to capital growth assets relative to defensive income-bearing style assets.

It is suitable for investors seeking a reasonable level of annual income without eliminating capital growth opportunities. The portfolio looks to invest a reasonable proportion of available funds in capital growth style assets such as shares and property and the remainder in interest bearing securities and cash. This type of portfolio would be expected to generate a return above inflation and have reasonable annual income and wealth accumulation potential over the longer term. It is designed for investors with a medium risk profile.

Who is this option suitable for?

Investors who:

- require a diversified balanced portfolio;
- are seeking moderate growth over the investment timeframe with a moderate level of income;
- accept a moderate degree of volatility associated with a relatively higher exposure to growth assets;
- accept the risk of price fluctuations particularly over periods less than the minimum investment timeframe and that capital preservation is not guaranteed.

Joseph Palmer Growth

Investment objective: To provide a growth seeking portfolio over the investment timeframe through exposure to a diversified portfolio of investments, with a significant emphasis on capital growth assets and lesser investment in income generating assets and to outperform the benchmark over rolling five-year periods.

Investment description

The Growth portfolio is designed for investors seeking a diversified portfolio with an emphasis on capital growth assets relative to defensive income bearing style assets.

It is suitable for investors seeking long-term capital gain and a reasonable level of annual income. The portfolio looks to invest the majority of available funds in capital growth style assets such as shares and property and the remainder in interest bearing securities and cash. This type of portfolio would be expected to generate a return above inflation and have reasonable annual income and wealth accumulation potential over the longer term. It is designed for investors with a medium to high risk profile.

Who is this option suitable for?

Investors who:

- seek a relatively high level of capital growth on their investment;
- seek a modest level of income;
- are willing to accept a high level of short-medium term capital volatility as a tradeoff for long-term capital growth;
- accept the risk of price fluctuations particularly over periods less than the minimum investment timeframe and that capital preservation is not guaranteed.

Model Portfolio Profile: SM0001

Morningstar ASX Top20

Investment objective: To provide total returns that closely replicate the income and capital growth of the 20 largest capitalisation stocks listed on the ASX (before taking into account fees and expenses).

Investment description

This model is a passively managed portfolio which invests in the 20 largest (by market capitalisation) listed on the ASX. The portfolio is made up of exposures to direct equity securities. The portfolio seeks to give investors exposure to a large proportion of the market index performance over time.

Who is this option suitable for?

- Investors who:
- seek a portfolio of large capitalisation Australian equities;
- seek a low cost, liquid, passively managed portfolio exposed to the ASX;
- accept a portfolio that delivers returns that closely replicate the index of the top 20 ASX equities, without any active investment management;
- has a suitably high tolerance to risk; and
- accept that the price of underlying securities may fluctuate significantly.

Morningstar Australian Shares Income Model

Investment objective: To provide investors with greater risk-adjusted returns and a higher sustainable franked dividend yield relative to the S&P/ASX 200 Index (TR) in the long term.

Investment description

This is an actively managed concentrated portfolio consisting of our best income ideas in the S&P/ASX 200 Index. Portfolio holdings primarily consist of companies with greater than average sustainable net yield expectations and trade at attractive discounts to intrinsic value relative to the portfolio universe according to our research team.

Who is this option suitable for?

Investors who seek a reliable, above-market average income yield with moderate long-term capital growth relative to that of the performance benchmark.

Morningstar Diversified Income Model

Investment objective: To achieve a consistent level of income at or above prevailing cash levels and the potential for long-term capital growth, by investing in a diversified portfolio that has an emphasis on income producing assets.

Investment description

An actively managed diversified portfolio of securities across both income oriented asset classes, such as cash and fixed interest securities, and growth asset classes such as Australian securities, property and global securities. In general, the portfolio's long-term average exposure will be around 60% income assets and 40% growth assets.

Who is this option suitable for?

This model is suitable for investors who:

- the main objective is to generate consistent income with the potential for capital growth over the long term; and
- are prepared to accept a moderate risk of capital loss to achieve this objective.

Morningstar High Growth Model

Investment objective: To achieve capital growth through investing in a diversified portfolio of predominantly growth assets classes, with a small proportion of defensive assets.

Investment description

This is an actively managed diversified portfolio of securities across: growth asset classes such as Australian securities, property and global securities; and defensive asset classes, such as cash and fixed-interest securities. In general, the portfolio's long-term average exposure will be around 90% growth assets and around 10% defensive assets; however, the allocations will be actively managed within the allowable asset allocation ranges depending on market conditions.

Who is this option suitable for?

This model is suitable for investors who:

- the main objective is to accumulate assets by targeting capital growth over the medium to long term; and
- are prepared to accept a high risk of capital loss to achieve the investment objective.

Model Portfolio Profile: IB0020

Morningstar Medalist Core Conservative Model

Investment objective: To deliver outperformance of the SAA weighted benchmark over rolling 3-year periods.

Investment description

The Portfolio has exposure to a diverse mix of managed fund investments, which include primarily interest-producing and some growth assets. Over the long term, the Portfolio aims to have an 85% allocation to defensive assets and a 15% allocation to growth assets.

The portfolios are constructed using managers that achieved a medalist rating and will seek to optimise the exposure to active and passive management, only using active management where the probability of a manager achieving a reasonable excess return for the asset class is greater than the probability of underperformance.

The Portfolio aims to reduce the probability of a negative return through a high exposure to defensive assets.

The Portfolio is constructed around an asset allocation based on the strategy's long-term objectives. The Portfolio and asset allocation are reviewed to adapt to changes in market conditions. The asset allocation, selection and blending of managed funds are actively managed with a strong focus on risk.

Fund managers, their funds and the construction of the Portfolio are regularly reviewed for suitability and market conditions.

Who is this option suitable for?

Designed for investors who:

- Whose main objective is stability of income and capital; and
- Seek a lower risk of capital loss but overall returns are also likely to be lower.

Model Portfolio Profile: IB0022

Morningstar Medalist Core Balanced Model

Investment objective: To deliver outperformance of the SAA weighted benchmark over rolling 5-year periods.

Investment description

The Portfolio has exposure to a diverse mix of managed fund investments, which include both interest-producing and growth assets. Over the long term, the Portfolio aims to have a 50% allocation to defensive assets and a 50% allocation to growth assets.

The portfolios are constructed using managers that achieved a medalist rating and will seek to optimise the exposure to active and passive management, only using active management where the probability of the medalist universe achieving a reasonable excess return for the asset class is greater than the probability of underperformance

Some capital volatility is expected due to exposure to growth asset classes.

The Portfolio is constructed around an asset allocation based on the strategy's long-term objectives. The Portfolio and asset allocation are reviewed to adapt to changes in market conditions. The asset allocation, selection and blending of managed funds are actively managed with a strong focus on risk.

Fund managers, their funds and the construction of the Portfolio are regularly reviewed for suitability and market conditions.

Who is this option suitable for?

Designed for investors who:

- Whose main objective is to maintain stable returns; and
- Are prepared to accept a medium risk of capital loss to achieve this objective.

Morningstar Medalist Core Growth Model

Investment objective: To deliver outperformance of the SAA weighted benchmark over rolling 7-year periods.

Investment description

The Portfolio has exposure to a diverse mix of managed fund investments, which include primarily growth assets and may have some exposure to interest-producing assets. Over the long term, the Portfolio aims to have a 30% allocation to defensive assets and a 70% allocation to growth assets.

The portfolios are constructed using managers that achieved a medalist rating and will seek to optimise the exposure to active and passive management, only using active management where the probability of the medalist universe achieving a reasonable excess return for the asset class is greater than the probability of underperformance

Some capital volatility is expected due to the high exposure to growth asset classes.

The Portfolio is constructed around an asset allocation based on the strategy's long-term objectives. The Portfolio and asset allocation are reviewed to adapt to changes in market conditions. The asset allocation, selection and blending of managed funds are actively managed with a strong focus on risk.

Fund managers, their funds and the construction of the Portfolio are regularly reviewed for suitability and market conditions.

Who is this option suitable for?

Designed for investors who:

- Whose main objective is to achieve balanced returns to meet their medium to long term financial goals; and
- Are prepared to accept a medium to high risk of capital loss to achieve this objective.

Model Portfolio Profile: NW0001

Nucleus Wealth Tactical Growth

Investment objective: This is a tactical asset allocation strategy aiming to generate returns 4.5% above Australia inflation over rolling 5-year periods. It has a mix of bonds and stocks designed for investors who have a higher tolerance for risk and want to take tactical tilts to different asset classes based on valuation.

Investment description

This strategy uses a top-down global macro strategy that seeks to identify and exploit inefficiencies between markets, regions, countries, and sectors for an Australian investor. It uses a mix of tactical asset allocation, mid- and large-cap stock selection (within the authorised investments below) in a transparent low-cost structure. This gives investors a core investment that can be efficiently mixed with other assets or strategies to deliver optimum returns for the risk taken.

All positions are currently implemented through physical investments. Rebalancing is considered at least monthly by the asset allocation committee. The committee often takes a longer-term view on assets and will choose to gradually build positions with dividends/excess capital rather than actively trading wherever possible.

Who is this option suitable for?

Investors who have a high tolerance for volatility

Nucleus Wealth Tactical Income

Investment objective: This is a conservative asset allocation strategy aiming to generate returns 2.5% above Australian inflation over rolling 3-year periods. It is designed for conservative investors looking to maintain a higher level of income and takes minor tactical tilts to different asset classes based on valuation.

Investment description

The Nucleus Wealth Tactical Income Model invests in a combination of Australian and International equities via ETFs but is heavily weighted towards cash and fixed interest. The portfolio takes minor tactical tilts to different asset classes based on valuation.

Who is this option suitable for?

Investors who have a very low risk tolerance and a short to medium investment horizon with an income focus for returns.

Model Portfolio Profile: NW0007

Nucleus Wealth Australian Leaders

Investment objective: To provide a gross of fee return in line with the S&P/ASX 20 Accumulation Index over rolling five year periods.

Investment description

The model provides exposure to a portfolio of the 25 largest companies on the ASX. Securities are selected using a rules-based approach.

Who is this option suitable for?

The portfolio is suitable for investors who:

- seek long term capital growth through investing in a portfolio of the 25 largest Australian listed companies with the tax advantages and customisation of a separately managed account;
- are willing to invest for at least 5 years;
- accept that returns over the short term may fluctuate and understand that an investment may potentially experience a high level of volatility associated with listed equities.

Nucleus Wealth Government Bond Ladder

Investment objective: To provide a gross of fee return in line with the Bloomberg AusBond Treasury 0+Yr Index over rolling three year periods.

Investment description

The model provides exposure to a portfolio of ASX listed Australian Commonwealth Government Bonds. The model will generally hold twelve bonds consisting of various maturities, with bonds selected using a rules-based approach and the overall portfolio constructed to target an average weighted maturity similar to the Bloomberg AusBond Treasury 0+Yr Index.

Who is this option suitable for?

This portfolio is suitable for investors who:

- seek a portfolio of ASX listed Australian Commonwealth Government Bonds with the tax advantages and customisation of a separately managed account;
- have a low to medium tolerance for risk;
- are willing to invest for at least 3 years.

Model Portfolio Profile: AR0001

Oreana Active Alpha Conservative Portfolio

Investment objective: The portfolio aims to achieve an investment return in excess of Bloomberg AusBond Bank Bill Index plus 2.00% p.a over rolling five-year periods before tax and after fees while aiming to restrict the incidence of negative calendar year returns over any 20-year period to 2.

Investment description

The investment strategy applies a fundamental, valuation-based approach that brings together the manager's Strategic Asset Allocation (SAA), Dynamic Asset Allocation (DAA) and Manager Selection processes to optimise risk adjusted returns.

The three-staged approach to managing multi-asset portfolios uses SAA to set broad risk parameters to harvest the benefits of diversification across return drivers. DAA is used to adjust risk exposures across the investment cycle. Manager Selection aims to efficiently implement the manager's desired asset allocation view and to enhance the probability of achieving the portfolio objectives. Investment exposure will be obtained through managed funds or Australian listed exchange traded products.

The portfolio targets investment returns of the Bloomberg AusBond Bank Bill Index plus 2.00% p.a over a five-year time frame through use of DAA and Manager Selection to enhance the longer-term SAA framework. DAA and Manager Selection (to active and passively managed strategies) can be used to either reduce risk or add return to improve the likelihood of meeting both the return and risk objective.

Who is this option suitable for?

This portfolio is suitable for investors who:

- seek an actively managed diversified portfolio of individual funds to provide improved clarity and transparency;
- believe active management can add value over the medium-term and are comfortable with the costs associated with active management;
- are comfortable with alternative asset classes in exchange for a greater degree of diversification;

- have a medium-term investment horizon; and
- seek returns in line with the stated investment and risk objective.

DAA and Manager Selection (to active and passively managed strategies) can be used to either reduce risk or add return to improve the likelihood of meeting both the return and risk objective.

Who is this option suitable for?

This portfolio is suitable for investors who:

- seek an actively managed diversified portfolio of individual funds to provide improved clarity and transparency;
- believe active management can add value over the medium-term and are comfortable with the costs associated with active management;
- are comfortable with alternative asset classes in exchange for a greater degree of diversification;

- have a medium-term investment horizon; and
- seek returns in line with the stated investment and risk objective.

Model Portfolio Profile: NA0001

Peak Navin Australian Industrial Growth

Investment objective: To achieve capital growth over the medium to long term. The portfolio also seeks to provide investors with some tax-effective income through the receipt of franked dividends. The aim of the portfolio is to outperform the S&P/ASX 200 Index (TR).

Investment description

The Model Portfolio invests in a concentrated portfolio of 15 to 30 stocks and excludes companies which the Model Portfolio Manager considers have low market liquidity or are speculative.

The portfolio maintains diversification across industry sectors. 80% of the Model Portfolio's equity exposure will be invested in leading Australian companies from the S&P/ASX 200.

Who is this option suitable for?

Investors who:

- seek capital growth and some tax effective dividend income;
- have a medium to long term investment horizon; and
- accept the risk of share price fluctuations but wish to moderate this risk by investing only in industrial shares.

Model Portfolio Profile: PK0003

Peak Smaller Companies

Investment objective: The Peak Smaller Companies Model aims to achieve capital growth from a portfolio of predominantly smaller companies that will have a bias to higher growth rather than higher income distributions. The model objective is to exceed returns over the S&P/ASX Small Ordinaries TR Index over a minimum of 5 years.

Investment description

The model consists of companies that will be predominantly outside the S&P/ASX 100 typically with a market capitalization of less than \$1bn. The managers will select shares that meet a longer-term growth profile.

Who is this option suitable for?

Investors who seek growth and not income, from a portfolio of well diversified smaller companies.

Model Portfolio Profile: PG0001

Pendal Australian Share Model

Investment objective: To deliver outperformance relative to the benchmark over a rolling three-year period by 3% per annum.

Investment description

The Model Portfolio predominantly invests in securities within the S&P/ASX 300 Index (TR).

Who is this option suitable for?

Investors who seek a broad-based, active Australian share portfolio utilising a fundamental company research approach where outperformance is driven primarily by share selection.

Model Portfolio Profile: PG0004

Pendal Sustainable Future Australian Share Model

Investment objective: To provide a return (before fees, costs and taxes) that outperforms the S&P/ASX 300 TR Index over rolling 5-year periods.

Investment description

The Model Portfolio predominantly invests in securities within the S&P/ASX 300 TR Index less the stocks which are negatively screened through the industry and stock exclusion screens based on ethical and ESG considerations.

Who is this option suitable for?

Designed for investors who seek a broad-based, active Australian share portfolio utilising a fundamental company research approach where outperformance is driven primarily by share selection.

Model Portfolio Profile: PE0002

Perennial Value Australian Shares

Investment objective: To provide a total return (after model fees) that exceeds the S&P/ASX 300 Index (TR), measured on a rolling three-year basis.

Investment description

The model invests in a diversified portfolio of listed, or soon-to-be-listed, Australian securities which Perennial Value believes will provide a combination of capital growth and income.

The model Portfolio will typically consist of approximately 45 Australian securities, with a minimum of 20 and a maximum of 70 shares.

Who is this option suitable for?

Investors who:

- have an investment horizon of five years or more; and
- are seeking exposure to a portfolio of Australian value-orientated companies.

Model Portfolio Profile: RA0005

Ralton Concentrated Australian Equity

Investment objective: To provide investors with long-term capital growth and some tax-effective income from a concentrated portfolio of Australian securities. The Model aims to deliver a return superior to that of the market over periods of five years or longer while at the same time seeking to minimise the risk of investment capital loss.

Investment description

The model is made up of a concentrated portfolio of Australian shares, aiming to provide investors with attractive long-term returns.

Who is this option suitable for?

Investors who:

- seek long term capital growth from a concentrated portfolio of Australian shares, with some tax-effective income;
- seek consistent total returns; and
- have a long-term investment horizon of at least five years and accept the risk of significant price fluctuations.

Model Portfolio Profile: RA0006

Ralton Dividend Builder

Investment objective: To provide investors with a consistent, tax-efficient and growing cash dividend yield, and long-term capital growth. The Model aims to deliver a return superior to that of the market over periods of five years or longer and an above market yield.

Investment description

The model invests in quality ASX-listed companies that are assessed as likely to provide investors with attractive long-term returns (capital growth plus above average yield and franking).

Who is this option suitable for?

Investors who:

- seek a consistent, above-average and tax-efficient cash dividend yield;
- seek long-term capital growth from a concentrated portfolio of Australian shares; and
- have a long-term investment horizon of at least five years and accept the risk of significant price fluctuations.

Model Portfolio Profile: RU0001

Russell Investments Managed Portfolio – Conservative

Investment objective: To provide returns over the short to medium term, with low volatility, consistent with a diversified mix of predominantly defensive assets and some growth-oriented assets. The Portfolio aims to outperform the benchmark over the long term.

Investment description

The Portfolio takes a diversified and dynamic approach to multi-asset investing using active, passive and factor-based strategies. The Portfolio dynamically combines a range of traditional asset classes and alternative approaches in order to achieve its investment objective.

The Portfolio typically invests in a diversified investment mix with exposure to growth investments of around 30% such as Australian shares, international shares, property and alternatives; and defensive investments of around 70% such as cash and fixed interest over the long term. The allocations will be actively managed within the allowable ranges depending on market conditions.

Who is this option suitable for?

Suitable for investors seeking a cost-effective diversified portfolio solution, who do not have a long investment horizon and whose most important consideration is having a low chance of a negative return over this horizon.

Russell Investments Managed Portfolio – High Growth

Investment objective: To provide capital growth over the long term, consistent with a portfolio focusing solely on growth-oriented assets, while accepting fluctuations in capital values in the medium term. The portfolio aims to outperform the benchmark over rolling 7-year periods, after fees and costs.

Investment description

The portfolio typically invests in a diversified investment mix with exposure to growth investments of around 100% such as Australian shares, international shares, property and alternatives over the long term. The allocations will be actively managed within the allowable ranges depending on market conditions.

The portfolio combines Russell Investments' dynamic multi-asset and multi-manager strategies with ETFs and direct shares. Russell Investments adopts a globally consistent, research-based approach to long-term asset allocation, active manager selection, multi-factor investing and dynamic portfolio management.

Who is this option suitable for?

This may suit investors with a minimum 7 year time frame who are seeking a cost-effective diversified portfolio solution, and wealth creation over the long term and are willing to accept the possibility of negative returns over the short to medium term.

Russell Investments Managed Portfolio – Geared 120

Investment objective: To provide capital growth over the long term consistent with a portfolio focusing on solely growth assets, while accepting fluctuations in capital values in the medium term. The portfolio aims to outperform the benchmark over rolling 8-year periods, after fees and costs.

Investment description

The portfolio typically invests in a diversified investment mix with exposure to growth investments of around 120% such as Australian shares, international shares, property and alternatives. The model achieves 120% exposure by investing partly in internally geared funds. The use of internally geared funds allows the exposure to growth investments to exceed the amount invested. The allocations can be actively managed within the allowable ranges depending on market conditions.

The portfolio combines managed funds (including internally geared funds) with ETFs and direct shares. Russell Investments adopts a globally consistent, research-based approach to long-term asset allocation, active manager selection, multi-factor investing and dynamic portfolio management. As the model invests in internally geared funds, investment involves leverage risk.

Who is this option suitable for?

This may suit investors with a minimum 8-year timeframe who are seeking a cost-effective diversified portfolio solution, and wealth creation over the long term and are willing to accept the possibility of negative returns over the short to medium term.

Model Portfolio Profile: RU0007

Russell Investments Sustainable Conservative Portfolio

Investment objective: The Managed Portfolio aims to provide returns over the short to medium term, with low volatility, consistent with a diversified mix of predominantly defensive assets and some growth-orientated assets. The portfolio aims to provide exposure to predominantly sustainable investment strategies and outperform the benchmark, after fees, over a rolling 3-year period.

Investment description

The portfolio typically invests in a diversified investment mix with exposure to growth investments of around 30% such as Australian shares, international shares, property and alternatives; and defensive investments of around 70% such as cash and fixed income over the long term. The allocations will be actively managed within the allowable ranges depending on market conditions. Exposure will be obtained through a combination of managed funds, ETFs, listed Australian shares and cash. Some of the underlying investments will be managed by Russell Investments through investments in Russell Investments ETFs and managed funds.

This is a diversified multi-asset portfolio with a sustainability focus. This portfolio is constructed using Russell Investments global responsible investing manager research and selection, asset allocation and portfolio management expertise.

The portfolio is constructed using third party investment advisor's accessed via managed fund structures and ETFs, as well as Russell Investments' sustainable proprietary strategies. The portfolio seeks to have a carbon score (weighted average carbon intensity) lower than the relevant multi-asset benchmarks, and ESG risk score lower than the relevant benchmarks. Data for calculating these metrics is supplied by third party data providers including Sustainalytics and MSCI. Where Russell Investments hold assets, they also implement a [Proxy Voting Policy](#) and shareholder engagement activities across responsible investing issues.

ESG and/or Sustainability related considerations

Russell Investments takes a total portfolio approach to ensure the overall portfolio is designed and managed in aiming to meet both investment and sustainability objectives. As part of the portfolio construction process, Russell Investments assesses how the total portfolio aligns with its sustainable objectives, and also considers the sustainability intentions, processes and outcomes of third party investment advisers (accessed via managed fund structures). Additionally, Russell proprietary strategies (including ETFs and direct shares) also have sustainability and ESG processes and outcomes.

The Russell Investments Sustainable Managed Portfolios predominantly use sustainable fund managers and strategies that integrate responsible investing practices into their decision making processes and/or portfolio design and are constructed using some key strategies outlined below.

Listed securities

The direct equity allocation within the portfolio is designed to provide flexible and transparent access to shares of Australian companies that demonstrate positive ESG characteristics and a lower carbon footprint, driven by three key steps:

- The starting universe of the direct equity allocation is the S&P/ASX 100 index.
- Russell Investments then seeks to exclude shares in companies that have exposure to certain activities that are inconsistent with the sustainability objectives of the Sustainable Portfolios. These activities and applicable materiality thresholds for exclusion can be found in the link below.
- Companies are analysed and assigned a Material ESG Score using proprietary Russell Investments data and metrics developed by external providers. The direct equity allocation within the Sustainable Portfolios aims have a higher weighted average Material ESG Score than the index.

This direct equity allocation is rebalanced semi-annually or more frequently as required to help balance incorporating up to date data where necessary without generating excessive turnover.

Unlisted Managed funds and Exchange Traded Funds (ETFs)

The Sustainable Managed Portfolios invest in underlying strategies that have stated sustainability objectives, where appropriate. The strategies may include externally managed active and/or index style "passive" strategies, as well as strategies managed wholly by Russell Investments. If there is no suitable underlying strategy with a stated sustainability objective available in an asset class, the Sustainable Portfolios may invest in strategies that don't have explicit sustainability objectives, provided they are considered by Russell Investments to be important in the portfolio construction process. Russell Investments reviews the fund design and intent, investment process and record of an investment manager in achieving the stated ESG objectives or outcomes and assesses a broad range of general investment characteristics in order to assign proprietary rankings.

More information on the Russell Investments Sustainable Investment Approach can be found [here](#) and on the Russell Investments [website](#).

Who is this option suitable for?

This is designed for investors who:

- Have sustainability focused investment beliefs;
- Have a minimum 3 years' timeline seeking to build wealth over the medium term; and
- Are willing to accept the possibility of negative returns over the shorter term and are prepared to accept a low to medium level of risk to achieve this objective.

Model Portfolio Profile: SD0001

Sandstone Income

Investment objective: To construct a relatively defensive Model Portfolio that seeks to provide investors with a predictable level of income above prevailing cash rates whilst mitigating the risk on capital over rolling 4-year periods.

Investment description

The portfolio will provide exposure to the Australian fixed interest asset class with a focus on investment grade Australian subordinated debt including hybrid securities and capital notes issued by banks, other large financial institutions, and corporates. The portfolio management team combines quantitative and qualitative analysis including fundamental credit and sector analysis, relative valuation and technical indicators to assemble a diversified portfolio with a defensive nature and sustainable level of income and franking credits. The portfolio will primarily be constructed from ASX listed hybrid securities and may include exposure to exchange traded funds which also invest in similar underlying exposures.

Who is this option suitable for?

Investors who:

- seek a professionally managed defensive portfolio focusing on achieving sustainable income and franking credits over the suggested minimum time frame and seek diversification from equities and other asset classes; and
- can accept the risk associated with subordinated fixed interest securities including hybrid securities. Hybrid securities can be considered complex, relatively illiquid and may exhibit equity security characteristics particularly during periods of financial market stress.

Model Portfolio Profile: SN0001

Seneca Australian Shares Portfolio

Investment objective: To outperform the S&P/ASX 200 TR Index over rolling five-year periods net of fees and costs.

Investment description

The portfolio seeks to invest in quality businesses at fair valuations with strong balance sheets, sustainable growth prospects, capable management teams and that are likely to achieve strong returns on capital.

The Manager utilises an active approach in constructing the portfolio with stock weights monitored for attractive risk-adjusted returns, relative to the benchmark. Considerations include:

- Sector and industry weights
- Gearing, market cap, dividend yield
- Factor or style (growth, value, quality, momentum, overseas earnings etc.)
- Management quality
- Historical volatility or benchmark beta

Who is this option suitable for?

Investors who:

- Are seeking an actively managed Australian equity portfolio with a focus on quality style characteristics such as high levels of return on equity or low leverage
- Attractive capital gains over the long term with a tax-effective annual income
- Have a long-term investment horizon and prefer a low to moderate turnover portfolio.

Model Portfolio Profile: SP0103

Shaw Debt Securities Income Portfolio

Investment objective: To provide investors with a predictable level of income whilst minimising risk to capital.

Investment description

The model invests in a portfolio of ASX-listed debt and shorter dated hybrid securities, debt-based ETFs and debt specialist managed funds. These products offer potential diversification benefits to both Australian equities and cash or term deposits. The model's return will be generated from a combination of interest payments and capital growth (realised and unrealised) from an actively managed portfolio strategy.

Who is this option suitable for?

Investors who:

- seek a sustainable income stream over a 3-year + time frame, with a lower risk of loss than equities and a higher rate of return than cash-like investments; and
- focus on minimising risk to capital and low volatility of returns.

Model Portfolio Profile: SP0104

Shaw Australian Equity (Large Cap) Income Portfolio

Investment objective: To provide a regular and sustainable substantially franked dividend income stream over the medium term (3-5 years).

Investment description

The portfolio aims to achieve its objective by investing in a portfolio of large-cap Australian listed companies and managed funds. Although the focus is yield generation, the investment process and risk management aim to ensure that risk to capital is minimised with the goal of some capital appreciation via both longer-term price appreciation and actively locking in gains as deemed appropriate to the objectives.

Who is this option suitable for?

Investors who:

- seek franked dividend income as the primary objective from an Australian equities portfolio and some capital appreciation;
- have an investment horizon of three years or more; and
- accept the risk of share price volatility.

Shaw Australian Equity (Large Cap) Growth Portfolio

Investment objective: To provide a level of capital appreciation over the longer term (5–7 years).

Investment description

The Shaw Australian Equity (Large Cap) Growth is tilted towards stocks that have superior earning growth capacity, and its focus is on the total return of each stock rather than the dividend income. Although the portfolio will generate income, income-focused stocks will be included if their total return criteria fits the portfolio's objective.

Who is this option suitable for?

Investors who:

- seek long-term capital growth as the primary objective from an Australian equities portfolio and some income;
- are in the accumulation phase;
- have an investment horizon of three years or more; and
- accept the risk of share price volatility.

Model Portfolio Profile: SP0106

Shaw Australian Equity (Small & Mid-Cap) Growth Portfolio

Investment objective: The Shaw Australian Equity (Small and Mid-Cap) Growth Portfolio is allocated to managers who specialise in identifying small and mid-sized stocks that have superior earning growth capacity and have a focus on the total return of each stock rather than simply dividend income. It aims to invest in managers who can exhibit a sustainable process to outperform the S&P/ASX Small Ordinaries index on a risk-adjusted basis after fees.

Investment description

The model will invest into a range of mostly active managed funds that focus on Australian mid and small capitalised companies listed on the ASX.

Shaw's investment process combines quantitative and qualitative criteria and analysis to identify fund managers who are considered to outperform in excess of the benchmark on a risk-adjusted basis after fees. The model will allocate to managers who are deemed to have complementary investment philosophies, management strategies and investment universes to reduce the probability of overlap and lack of diversification.

Who is this option suitable for?

Investors who:

- seek long-term capital growth as the primary objective from an Australian equities portfolio and some income;
- have an investment horizon of five years or more; and
- accept the risk of share price volatility.

Model Portfolio Profile: SP0111

Shaw Liquid Alternatives Portfolio

Investment objective: To provide regular and sustainable income and capital growth over the medium term (3 – 5 years) whilst minimising risk to capital.

Investment description

The portfolio is a blend of strategies and investments that can be expected to have a lower correlation to equities, bonds and other traditional beta-style investments. The portfolio was designed primarily to lower the downside variance of an income, balanced or growth portfolio that uses a mixture of bonds and equities to derive a given long-term return. The strategies and managers chosen for the portfolio have a demonstrable track record of protecting capital during downturns and when blended in the appropriate weights can significantly reduce the downside potential of a bond and equity portfolio. Asset classes and strategies may include Global Macro, Managed Futures (Trends), Long/Short and Market Neutral, Commodities and Dynamic Markets. This portfolio is designed to act as a volatility dampener and diversifier to an existing portfolio of liquid assets.

Who is this option suitable for?

Investors who:

- seek sustainable and lower volatility returns (mix of income and capital growth) as the primary objective that will be less correlated to moves in underlying asset prices in traditional investments such as equities and bonds;
- when used as a standalone investment option, are looking for a lower risk/lower return exposure that is not correlated with traditional asset class returns;
- when blended with a traditional balanced or growth portfolio, seek to reduce drawdown and smooth returns;
- have an investment horizon of three years or more; and
- accept the risk of volatility in their investment return.

Model Portfolio Profile: SS0001

State Street Growth ETF

Investment objective: The Manager attempts to match, before expenses, the performance of the Benchmark. The Benchmark is a fixed combination of single asset class indices, rebalanced on a quarterly basis. Some performance differences are expected to arise from miss-matches between the vehicles used to gain exposure and underlying indices used in the benchmark calculation.

Investment description

The portfolio seeks to provide optimal capital efficiency over a long-term horizon. The growth portfolio is predominantly focused on capital growth. The portfolio is constructed, based on risk tolerance, to achieve market exposure across both equity and fixed income markets and can be utilised as core allocations for investors with a diverse set of return and risk objectives.

The portfolio is founded on a strategic asset allocation framework, which is a core capability of State Street Global Advisors' Investment Solutions Group. The portfolio construction process uses long-term asset class returns, risk and correlation forecasts to identify an asset allocation that efficiently balances these factors to meet the respective objectives. These allocations are then carefully refined by the experienced portfolio management team. The portfolio's risk based investment strategy provides exposure to asset classes such as equities and fixed income securities. The strategic asset allocation framework offers a disciplined rebalance approach in which the portfolio is rebalanced to the identified strategic allocation on a quarterly basis.

Constructed using the Australian ETF universe, only the funds that meet the Investment Solutions Group's investment criteria are included in the model portfolios – irrespective of issuer. All ETFs held in the State Street Growth ETF Model Portfolio are reviewed by the manager's global Investment Manager Oversight Team (IMOT), a group which conducts ETF due diligence and monitoring as well as day-to-day manager selection and review.

Who is this option suitable for?

The portfolio is suitable for investors that are profiled as growth investors according to their risk appetite. This portfolio is aligned to investors seeking exposure to capital growth. Given the nature of this investment strategy investors should be comfortable carrying greater risk of downside loss and volatility of return.

State Street Target Income ETF

Investment objective: The State Street Target Income ETF Model Portfolio seeks to provide a target level of income that is determined on an annual basis by using State Street's strategic asset allocation process to drive income generation across a diversified base of asset classes.

Investment description

Based on long-term asset class forecasts, the portfolio allocates across a wide variety of asset classes with a focus on generating a target level of income. For the 2024/2025 financial year the Manager aims to target, before expenses, an income objective of 4.25% per annum. The target income is subject to review on an annual basis.

The portfolio relies on State Street's strategic asset allocation process that blends quantitative and fundamental components. Strategic asset allocation is a core capability of State Street Global Advisors' Investment Solutions Group and forms the foundation for many services offered by State Street Global Advisors. It involves the evaluation of global asset classes as well as market segments. The manager's investment views are informed by our quantitative approach and refined by the fundamental views. This approach aims to bring together the best of each element to help build an effective, income based portfolio with diversification across asset classes.

The investment process for a typical strategic asset allocation begins with return and risk objectives. The model portfolio construction process uses long-term asset class return, risk and correlation forecasts to identify an asset allocation that looks to drive income generation. These allocations are then carefully refined by the experienced portfolio management team. Given the portfolio's objective is focused on income generation, the portfolio is expected to hold higher yielding growth assets as well as income assets most of the time.

Constructed using the Australian ETF universe, only the funds that meet the Investment Solutions Group's investment criteria are included in the model portfolios – irrespective of issuer. All ETFs held in the State Street Target Income ETF Model Portfolio are also reviewed by the manager's global Investment Manager Oversight Team (IMOT), a group which conducts ETF due diligence and monitoring as well as day-to-day manager selection and review.

Who is this option suitable for?

The Portfolio is intended to be suited to investors who:

- Seek a consistent income return that grows over the long term; and
- Are prepared to accept a medium risk of capital loss to achieve this objective.

Model Portfolio Profile: SS0005

State Street High Growth ETF

Investment objective: The Manager attempts to match, before expenses, the performance of the Benchmark. The Benchmark is a fixed combination of single asset class indices, rebalanced on a quarterly basis. Some performance differences are expected to arise from miss-matches between the vehicles used to gain exposure and underlying indices used in the benchmark.

Investment description

The portfolio seeks to provide optimal capital efficiency over a long-term horizon. The growth portfolio is predominantly focused on capital growth. The portfolio is constructed, based on risk tolerance, to achieve market exposure across both equity and fixed income markets and can be utilised as core allocations for investors with a diverse set of return and risk objectives.

The portfolio is founded on a strategic asset allocation framework, which is a core capability of State Street Global Advisors' Investment Solutions Group. The portfolio construction process uses long-term asset class returns, risk and correlation forecasts to identify an asset allocation that efficiently balances these factors to meet the respective objectives. These allocations are then carefully refined by the experienced portfolio management team. The portfolio's risk based investment strategy provides exposure to asset classes such as equities and fixed income securities. The strategic asset allocation framework offers a disciplined rebalance approach in which the portfolio is rebalanced to the identified strategic allocation on a quarterly basis.

Constructed using the Australian ETF universe, only the funds that meet the Investment Solutions Group's investment criteria are included in the model portfolios – irrespective of issuer. All ETFs held in the State Street Growth ETF Model Portfolio are reviewed by the manager's global Investment Manager Oversight Team (IMOT), a group which conducts ETF due diligence and monitoring as well as day-to-day manager selection and review.

Who is this option suitable for?

The portfolio is suitable for investors that are profiled as high growth investors according to their risk appetite. This portfolio is aligned to investors seeking exposure to capital growth. Given the nature of this investment strategy investors should be comfortable carrying greater risk of downside loss and volatility of return.

Model Portfolio Profile: SR0010

Sterling/Clime Conservative/Pension

Investment objective: To provide investors with a solid foundation of regular income (with some franking) and some capital growth over the medium term from a purposeful portfolio of Australian shares, International Shares, Property, Interest Bearing Securities and Cash. The strategy seeks to deliver strong risk-adjusted total returns with a strong focus on capital preservation over the investment strategy minimum timeframe – provide a return beyond the Sterling Clime Benchmark (as detailed below) with an equivalent level of risk as measured by monthly variability of returns.

Investment description

The Sterling/Clime Conservative/Pension Portfolio is designed to provide income with some capital growth from low volatility assets.

Who is this option suitable for?

Investors who:

- seek relatively stable, regular income from low-volatility assets, but with some exposure to the share market;
- are focused on capital preservation and are prepared to forego the potential of higher returns for lower volatility and the preservation of capital;
- accept the risk of price fluctuations particularly over periods less than the minimum investment timeframe and that capital preservation is not guaranteed; and
- understand that withdrawals from this Portfolio may be delayed due to the fixed terms of maturity for some fixed-interest investments such as term deposits.

Sterling/Clime Balanced

Investment objective: To provide investors with a blend of regular income (with some franking) and consistent capital growth over the long term from a purposeful portfolio of Australian shares, International Shares, Property, Interest Bearing Securities and Cash. The strategy seeks to deliver strong risk-adjusted total returns over the investment strategy minimum timeframe – provide a return beyond the Sterling Clime Benchmark (as detailed below) with an equivalent level of risk as measured by monthly variability of returns.

Investment description

The Sterling/Clime Balanced Portfolio aims to provide a moderate level of income and moderate level of capital growth by investing in a majority of Australian equities and fixed income.

Who is this option suitable for?

Investors who:

- require a diversified balanced portfolio;
- are seeking moderate growth over the investment timeframe with a moderate level of income;
- accept a moderate degree of volatility associated with a relatively higher exposure to growth assets;
- accept the risk of price fluctuations particularly over periods less than the minimum investment timeframe and that capital preservation is not guaranteed; and
- understand that withdrawals from this Portfolio may be delayed due to the fixed terms of maturity for some fixed interest investments such as term deposits.

Benchmark

Sterling/Clime Growth

Investment objective: To provide investors with a blend of regular income (with some franking) and consistent capital growth over the long term from a purposeful portfolio of Australian shares, International Shares, Property, Interest Bearing Securities and Cash. The strategy seeks to deliver strong risk-adjusted total returns over the investment strategy minimum timeframe – provide a return beyond the Sterling Clime Benchmark (as detailed below) with an equivalent level of risk as measured by monthly variability of returns.

Investment description

The Sterling/Clime Growth Portfolio aims to provide capital growth with some income by investing in predominately Australian and International equities along with some fixed interest.

Who is this option suitable for?

Investors who:

- seek a relatively high level of capital growth on their investment;
- seek a modest level of income;
- are willing to accept a high level of short-medium term capital volatility as a trade-off for long-term capital growth;
- accept the risk of price fluctuations particularly over periods less than the minimum investment timeframe and that capital preservation is not guaranteed; and
- understand that withdrawals from this Portfolio may be delayed due to the fixed terms of maturity for some fixed interest investments such as term deposits.

Benchmark

Sterling/Clime Australian Equities

Investment objective: To provide investors with consistent capital growth and regular income (with some franking) over the long term from investment in a purposeful portfolio of Australian shares. The strategy seeks to deliver strong risk-adjusted total returns over the investment strategy minimum timeframe – provide a return beyond the benchmark (as detailed below) with a lower level of risk as measured by monthly variability of returns.

Investment description

The Sterling/Clime Australian equities portfolio provides investors with income and capital growth by investing predominantly in Australian equities.

Who is this option suitable for?

Investors who:

- are seeking long-term capital growth and market-average income yields, primarily from franked dividends, via a portfolio of Australian securities; and
- are prepared to accept the risk of price fluctuations.

Model Portfolio Profile: RN0001

Sterling Resonant Conservative Portfolio

Investment objective: To outperform the Bloomberg AusBond Bank Bill Index by a minimum of 1.6% p.a. net of investment management fees and gross of transaction costs over rolling 4-year periods.

Investment description

To invest in an actively managed diversified portfolio of direct Australian equity securities, managed funds and ETF's across a broad range of asset classes. The portfolio is optimised to aim for the highest level of return whilst remaining in the conservative portfolio allocation set out below. As a result, asset allocations may vary depending on market conditions and correlations, however it is expected that over a full economic cycle, growth assets will average approximately 40%, while defensive assets will average approximately 60%. The portfolio invests a minimum of 40% in defensive assets (cash and fixed interest).

Who is this option suitable for?

Investors who:

- seek a diversified portfolio with exposure to a broad range of asset classes;
- are able to invest for the suggested minimum time frame or more; and
- are prepared to accept the risk of capital volatility in order to achieve the long-term investment objective.

Model Portfolio Profile: WS0104

TWD Income Model

Investment objective: The TWD Income SMA aims to deliver an income return of 2% above the benchmark, net of fees, while limiting the risk of permanent capital loss over the suggested investment timeframe.

Investment description

The TWD Income Model aims to provide a concentrated fixed interest exposure and invests in listed hybrid/bond securities, Exchange Traded Funds, listed managed funds and listed investment companies. The portfolio has a bias towards listed hybrid/bond exposure and highly rated, floating or variable rate fixed interest securities.

The portfolio aims to exhibit limited capital volatility over the suggested investment timeframe and is not expected to generate significant long-term capital growth. Issuers of listed hybrid/bond securities must have an investment grade credit rating. The Model's allocations to Exchange Traded Funds, listed managed funds and listed investment companies may contain underlying exposure to fixed interest securities rated below investment grade.

Who is this option suitable for?

Investors who:

- seek higher than market, stable, tax-efficient income returns; and
- have a medium-term investment horizon and are not expecting any capital gains from their investment.

Model Portfolio Profile: WS0109

TWD Growth Model

Investment objective: The portfolio aims to outperform the Morningstar Australia Growth Target Allocation NR AUD Benchmark, over six years, after fees.

Investment description

The portfolio is an actively managed, diversified portfolio of securities across both growth assets such as domestic and global shares, property trusts, Exchange Traded Funds, and defensive assets such as cash and fixed interest securities. The portfolio will generally hold approximately 80% in growth assets and 20% in defensive assets over time. The portfolio manager's strategy is relatively unconstrained, and the actual asset allocation will deviate significantly from the expected long-term average position to ensure the portfolio is positioned in line with the managers macro-economic views and expected asset class and sector returns to target the portfolio's investment objective.

Who is this option suitable for?

Investors who:

- seek long-term capital growth;
- would like some tax-effective income;
- have an investment horizon of at least six years; and
- accept a high degree of price fluctuations.

Model Portfolio Profile: VP0101

VIP Conservative Portfolio

Investment objective: The performance objective is to outperform the benchmark after investment management fees over the minimum investment time frame.

Investment description

The model provides an actively managed diversified portfolio with a strategic allocation of 30% in growth assets and 70% in defensive assets. The manager uses tactical asset allocation within pre-defined ranges as a key contributor to the manager's investment objective and core philosophy of minimising portfolio volatility. Underlying exposures will consist of direct Australian equities, managed funds and exchange traded products. Portfolio construction is based on the manager's macroeconomic views and direct security selection is undertaken using a fundamental valuation approach.

Who is this option suitable for?

The portfolio suits investors who:

- seek a diversified and actively managed portfolio with some exposure to equities and an emphasis on capital preservation;
- seek a stable and regular income from a low volatility portfolio; and
- are able to invest for the suggested minimum investment timeframe.

VIP Balanced Portfolio

Investment objective: The performance objective is to outperform the benchmark after investment management fees over the minimum investment time frame.

Investment description

The model seeks to provide a combination of capital growth and income over the medium to long term through investing in an actively managed diversified portfolio with a strategic allocation of 60% in growth assets and 40% in defensive assets. The manager uses tactical asset allocation within pre-defined ranges as a key contributor to the manager's investment objective and core philosophy of minimising portfolio volatility. Underlying exposures will consist of direct Australian equities, managed funds and exchange traded products. Portfolio construction is based on the manager's macroeconomic views and direct security selection is undertaken using a fundamental valuation approach.

Who is this option suitable for?

The portfolio suits investors who:

- seek a diversified and actively managed portfolio with potential for a moderate level of capital growth and income;
- can accept short to medium term volatility as a trade-off for potential long-term capital growth; and
- are able to invest for the suggested minimum investment timeframe.

Model Portfolio Profile: VP0104

VIP Diversified Ethical Portfolio

Investment objective: The performance objective is to outperform the benchmark after investment management fees over the minimum investment time frame.

Investment description

A diversified portfolio of directly and indirectly held assets having a strategic allocation of 70% in growth assets and 30% defensive assets. The investment objective of the portfolio is to provide investors with the potential for a high level of capital growth over the medium to long term with an emphasis on growth assets over defensive assets. The underlying assets are screened via environmental, social, and governance metrics as well as comprehensive research on the underlying companies' business models and practices in respect with these metrics. It is designed to use tactical asset allocation within pre-defined ranges as the key contributor to the manager's performance objective and core philosophy of minimising portfolio volatility. Underlying exposures will consist of direct Australian equities, managed funds and exchange traded products.

Who is this option suitable for?

The portfolio suits investors who:

- seek a diversified and actively managed portfolio with potential for a high level of capital growth and a modest level of income;
- wishes to have their wealth invested in companies which the manager views as being aware and acting on their responsibility to participate in ensuring a more sustainable future;
- can accept a high level of short to medium term volatility as a trade-off for potential long-term capital growth; and
- are able to invest for the suggested minimum investment timeframe.

Model Portfolio Profile: VP0105

VIP Climate Sustainability Portfolio

Investment objective: The performance objective is to outperform the benchmark after investment management fees over the minimum investment time frame.

Investment description

A concentrated portfolio investing in 20 to 40 Australian equities listed on the ASX across a range of market capitalisations. The objective of the portfolio is to provide investors with potential growth through exposure to Australian equities using an active value approach. Stock selection is guided by environmental, social, and governance (ESG) screens seeking to identify companies the manager views as acting in line with expectations of creating a more sustainable future. The manager will seek to place emphasis on the environmental impact of a company in a way that assesses its efforts to reduce its carbon footprint.

Who is this option suitable for?

The portfolio suits investors who:

- seek an actively managed portfolio of direct Australian equities with potential for a high level of capital growth and a modest level of income;
- wishes to have their wealth invested in companies that are aware and acting on their responsibility to participate in ensuring a more sustainable future;
- can accept a high level of short to medium term volatility and potentially reduced trade liquidity as a trade-off for potential long-term capital growth;
- seek some exposure to smaller capitalisation companies to access firms that the manager views as being involved in the green economy transition; and
- are able to invest for the suggested minimum investment timeframe.

Model Portfolio Profile: WS0004

Watershed Income

Investment objective: The Watershed Income SMA aims to deliver an income return of 2% above the benchmark, net of fees, while limiting the risk of permanent capital loss over the suggested investment timeframe.

Investment description

The Watershed Income Model aims to provide a concentrated fixed interest exposure and invests in listed hybrid/bond securities, Exchange Traded Funds, listed managed funds and listed investment companies. The portfolio has a bias towards listed hybrid/bond exposure and highly rated, floating or variable rate fixed interest securities.

The portfolio aims to exhibit limited capital volatility over the suggested investment timeframe and is not expected to generate significant long-term capital growth. Issuers of listed hybrid/bond securities must have an investment grade credit rating. The Model's allocations to Exchange Traded Funds, listed managed funds and listed investment companies may contain underlying exposure to fixed interest securities rated below investment grade.

Who is this option suitable for?

Investors who:

- seek higher than market, stable, tax-efficient income returns; and
- have a medium-term investment horizon and are not expecting any capital gains from their investment.

Model Portfolio Profile: WS0010

Watershed High Growth

Investment objective: The portfolio aims to outperform the Morningstar Australia Aggressive Target Allocation NR AUD Index, over seven years, after fees.

Investment description

The portfolio is an actively managed, diversified portfolio of securities across both growth assets such as domestic and global shares, property trusts and defensive assets such as cash and fixed interest securities. The portfolio will generally hold approximately 90% in growth assets and 10% in defensive assets over time.

The portfolio manager's strategy is relatively unconstrained, and the actual asset allocation will deviate significantly from the expected long-term average position to ensure the portfolio is positioned in line with the managers macro-economic views and expected asset class and sector returns to target the portfolio's investment objective.

Who is this option suitable for?

Investors who:

- seek long-term capital growth as a priority;
- would like some tax-effective income;
- have an investment horizon of at least seven years; and
- accept a high degree of price fluctuations.

Model Portfolio Profile: CB0001

Clearbridge Developed Markets Infrastructure Income

Investment objective: To provide investors with regular and stable income comprised of dividends, distributions and interest received plus capital growth from a portfolio of global infrastructure securities and to outperform the benchmark over a full market cycle.

Investment description

ClearBridge is a specialist listed infrastructure manager. The Model investment process is designed to provide investors with attractive and stable returns through investing in an actively managed portfolio of global listed infrastructure companies. The Model holds a diverse range of global infrastructure securities across a number of infrastructure subsectors such as gas, electricity and water utilities, toll-roads, airports, rail and communication infrastructure and across geographic regions in developed markets.

The Manager believes significant opportunities can arise as listed markets misprice infrastructure assets in the short-term. Portfolio construction is focused on delivering consistent absolute real returns underpinned by attractive dividends. Securities are selected using a longer-term fundamental valuation approach within a rigorous analytical framework.

Who is this option suitable for?

Investors who:

- seek access to an actively managed Model of direct holdings in global listed infrastructure securities designed to provide regular and stable income;
- accept the risk of global equity market volatility and foreign currency fluctuations; and
- are able to accept the suggested minimum investment timeframe.

Franklin Concentrated Global Equity ex-Australia Portfolio

Investment objective: To outperform the MSCI World ex Australia Index (Net Dividends), in Australian dollar terms after fees and expenses (but before taxes), over the medium to longer term.

Investment description

The Franklin Concentrated Equity ex-Australia Portfolio will comprise a portfolio of international equities.

The strategy's investment philosophy is a disciplined investment process which aims to build a concentrated yet diversified portfolio that seeks to generate a strong risk-adjusted return. The strategy adopts a stock selection process focused on fundamental company research and analysis, in addition to a consistent valuation approach. This approach aims to identify quality growth companies with sustainable business models, attractive levels of free cash flow and proven management with a strong track record that is focused on the creation of shareholder value.

Who is this option suitable for?

Investors who:

- wish to gain exposure to a global portfolio of equity securities;
- have an investment timeframe of at least five years; and
- are comfortable with the risk level of the strategy.

Joseph Palmer Global Leaders

Investment objective: To provide capital growth greater than the MSCI World ex Australia AUD Index through exposure to a diversified portfolio of international equities.

Investment description

The Joseph Palmer Global Leaders Portfolio invests predominately in International equities over the long term.

Who is this option suitable for?

Investors who:

- seek long term returns from a portfolio of international equities without exposure to other asset classes;
- do not seek relatively high levels of income;
- are willing to accept very high levels of short-medium term capital volatility and potential for loss as a tradeoff for long-term capital growth;
- understand that an investment may potentially experience a high level of volatility associated with equity investment and foreign currency exposure;
- are prepared to invest for the minimum investment timeframe; and
- accept the risk of price fluctuations, particularly over periods less than the minimum investment timeframe, and that capital preservation is not guaranteed.

Model Portfolio Profile: LZ0001

Lazard Global Equity Franchise Model

Investment objective: The Model seeks to achieve total returns (including income and capital appreciation and before the deduction of fees and taxes) in excess of the MSCI World Index with lower risk over rolling five-year periods.

Investment description

The Lazard Global Equity Franchise Model is an actively managed, 'long-only', 'benchmark unaware' strategy that invests in listed equities which meet the Lazard Global Equity Franchise team's definition of an 'economic franchise' across global stock markets. The model seeks to invest in companies with a high degree of earnings forecastability that are assessed as trading below their intrinsic value.

Lazard defines an economic franchise as a business that has historically shown a proven ability to generate unleveraged returns, at or above its cost of capital, for long periods of time. Lazard considers that franchises are able to accomplish this performance because of competitive advantages (or "moats"), which often arise from intangible, industry, or product-related features such as brand, IP or customer switching costs. Lazard believe moats typically fall into one of five categories:

- Natural Monopoly.
- Cost Leadership (Economies of Scale)
- Network Effects
- Brands & Intellectual Property
- High Switching Costs.

Who is this option suitable for?

This product is likely to be appropriate for a consumer seeking capital growth and/or potentially income distribution, to be used as a small/satellite or potentially a core component within a portfolio, where the consumer has a long or potentially medium investment timeframe, with a high or potentially very high risk/return profile and needs at least daily access to capital.

Model Portfolio Profile: NW0008

Nucleus Wealth Global Leaders

Investment objective: To provide a gross of fee return approximating the MSCI World Index in AUD over rolling five year periods by investing in the largest 40 equity securities listed on developed market exchanges.

Investment description

The model provides exposure to a portfolio of the largest global equities by market capitalisation. The model will generally hold the 40 largest equity securities listed on developed market exchanges with securities selected using a rules-based approach. The portfolio may tend to underperform the MSCI World Index when larger companies underperform smaller companies within the index. Conversely, the portfolio may tend to outperform the MSCI World Index when larger companies outperform smaller companies within the index.

Who is this option suitable for?

This portfolio is suitable for investors who:

- seek long term capital growth through investing in a portfolio of large capitalisation direct international equity securities selected using a rules-based approach, with the tax advantages and customisation of a separately managed account;
- are willing to invest for at least 5 years;
- accept that returns over the short term may fluctuate and understand that an investment may potentially experience a high level of volatility associated with equity and foreign currency exposure.

Model Portfolio Profile: SP0201

Shaw Global Equity Income Model

Investment objective: To model aims to deliver an above market yield with the potential for long-term sustainable income growth, and some capital appreciation. The investment and risk management processes will aim to provide a total return in excess of the benchmark over rolling 7-year periods whilst providing downside protection with lower overall volatility than the index.

Investment description

The Model is a global equity strategy that invests in a concentrated direct portfolio of dividend-paying large-cap global stocks and managed using an income and value style. There is a strong investment focus on selecting companies the model manager believes are inexpensive on a price-to-earnings basis, have above average dividend yields, and strong long-term earnings and dividend growth potential. The model manager will consider assessments of valuation, enduring competitive advantage, earnings catalysts, dividend policy and the macroeconomic and geopolitical factors to guide the investment process. The portfolio is expected to have exposure to emerging market companies.

Who is this option suitable for?

Investors who:

- seek dividend income as the primary objective from an actively managed portfolio of direct global equity securities, with capital appreciation as a secondary objective
- have an investment horizon of seven years or more; and
- accept the risk of global equity share price volatility and the risk associated with foreign currency exchange rate movements.

Model Portfolio Profile: TP0001

T. Rowe Price Concentrated Global Equity SMA

Investment objective: The portfolio aims to outperform the MSCI World ex-Australia Index (AUD) over rolling three-year periods.

Investment description

T. Rowe Price applies an active, style agnostic approach to a global opportunity set to create a portfolio of high conviction investments in companies with competitive advantages positioned on the right side of secular change. The manager's research driven advantage integrates bottom-up fundamental research and absolute and relative risk measures with an aim to provide durable performance over a full market cycle.

The portfolio largely invests in developed market international equities and may include some exposure to Australian listed and emerging market companies. It may be expected to outperform in down markets given the focus on companies that offer durable growth at reasonable valuations and conversely, may be expected to underperform in very strong markets led by a narrow portion of the market driven by high/extreme valuations.

Who is this option suitable for?

This option is suitable for investors who:

- are looking for exposure to an actively managed portfolio of direct global equity securities;
- seek steady growth in principal with active risk control; and
- can accept the risk of short-term share price and foreign currency fluctuations associated with global equities.

Model Portfolio Profile: UC0001

UBS CBRE Concentrated Global Property Model

Investment objective: To provide investors with an actively managed portfolio of global listed property securities across a range of geographic and economic sectors. The Portfolio aims to outperform (after management costs) the FTSE EPRA/NAREIT Developed Rental Net Return Index (AUD) over rolling three-year periods.

Investment description

The Model is an actively managed strategy investing in a direct portfolio of global property and property-related equity securities across a range of geographic and economic sectors. The strategy uses a multi-step investment process for constructing the portfolio that combines top-down region and sector allocation with bottom-up individual stock selection.

Top-down sector and regional allocation is determined through a systematic evaluation of listed and direct property market trends and conditions. Bottom-up stock selection is driven by proprietary analytical techniques to conduct fundamental company analysis, which provides a framework for security selection through an analysis of individual securities independently and relative to each other.

Who is this option suitable for?

Investors who seek exposure to a concentrated portfolio of global property securities diversified across a range of geographic and economic sectors and:

- accept the risk of global equity market volatility and foreign currency fluctuations; and
- are prepared to invest for the minimum investment timeframe.
